Objective

Devops engineer having 2 years of experience, looking for a platform where I can Implement my skills which I have learned with my past experience and can get a chance to gain new skills, which will help to grow in future.

Experience

SENIOR SOFTWARE ENGINEER | INFOSYS PVT LTD | 2020-PRESENT

I was placed under GST project (GOI) where I used to Configure and maintain Jenkins to implement the CI process and integrated the tool with Maven to schedule the builds and automate the deployment. I also monitored the automated build and continuous software integration process to drive build/release failure resolution. Using OpenShift tool to develop and deploy the application. Post deployment, I also did Monitoring of pod health in server along with monitoring utilization with the use of Grafana tool.

Apart from this I was also responsible for the Configuration of API's using CA API Gateway the product of Layer 7, Configuration and management of Redis and JDG cache, Installation and upgradation of Jboss Data Grid (Redhat).

Key Achievement's

- Was awarded employee of the month consecutive 2 months.
- Appreciation received by client for providing accurate and zero error in service.
- Stabilized the project by resolving production issue.
- Volunteered the team in organizing various colleague engagement activities within my tier.

Skills & Abilities

- Git (Version Control).
- Jenkins.
- Maven, SonarQube.
- Nexus, Ansible, Grafana (Monitoring)
- Docker, RedHat OpenShift.
- CA Api Gateway & Developer Portal (Layer 7)
- Jboss Data Grid (JDG RedHat).
- Redis (Redis labs)
- Linux

Seminars/Certification

- Training/Internship Certificate from Infosys.
- Certified in Core java.
- Fundamental Azure DevOps Infosys Lex Certification.
